ANOVIA INJURY REHAB

YOUR ROAD TO RECOVERY

Your attorney is already fighting for your rights and your best outcome, and Anovia Inury Rehab is here to make sure your physical recovery matches that same level of commitment. While your legal team handles the case, our physician-led team focuses on getting you better, documenting your progress and ensuring the full impact of your injuries is reflected in your clinical record. Together, you have two dedicated partners working toward the same goal: making you whole again.

Here's what to expect.

1. **Contact Anovia Health**
   Call or visit Anovia Health to schedule your initial consultation. Let us know you were injured in an auto accident and that you have an attorney representing you.

2. **Your First Appointment**
   Our physician-led team will conduct a thorough evaluation of your injuries, review any existing medical records or imaging and begin building a picture of how the accident has affected your health and daily life.

3. **Your Personalized Care Plan**
   Based on your evaluation, we design a treatment plan tailored to your specific injuries and recovery goals. This may include chiropractic care, functional rehabilitation, assisted stretching and massage therapy.

4. **Begin Treatment**
   You start care on a schedule built around your needs and availability. Our team coordinates across all services to make sure each phase of treatment is working together toward your recovery.

5. **Ongoing Progress Tracking**
   At every visit, your progress is monitored and documented. Your care plan is adjusted as you improve, and detailed records are maintained throughout.

6. **Communication with Your Attorney**
   Anovia Health works alongside your legal team, providing timely documentation and clinical records that reflect the full scope of your injuries and recovery progress.

7. **Recovery and Beyond**
   Once you reach your recovery goals, we ensure you have the tools and guidance to maintain your results and get back to the life you had before the accident.
